

SHIBACOVID

Helping the most impacted through the power of community, blockchain technology, and DeFi.

INTRODUCTION

The drive and motivation behind the concept and development of this project was clearer after such a year we had in 2020. The world was brought to her knees with a pandemic unlike we have seen before in our lifetime. We saw the spread, and we watched as it ate up lives in an unimaginable manner. The freedom taken for granted was met with limitations, as we embraced isolation for almost a year as we lived in fear.

We are gradually at a time where we are healing and returning to normal as a people and the world as a whole. We cannot forget every random act of kindness that was shown, the love we shared, and most importantly the unity as a people. As we transition into the new normal, some will never know normal as the pandemic changed lives forever.

While we are navigating this new world of ours, we cannot forget how important it is for us to give back to the community as we try to get back on our feet. The core of this project is the focus on giving back to the cause of helping the COVID-19 impacted Humans and Pets around the world regardless of the region, nation and continent they belong.

While it is not new to see a project revolutionized towards a cause, ShibaCovid is unique on its own. We focus on the world's major problem at the moment, the impact of COVID-19 to both Humans and Pets, especially the less privileged, while having DeFi features which will take this project to another level.

ShibaCovid is built upon the foundation of community involvement and synergy which also rewards community members who participate in the eco-system with immeasurable amounts as the project grows. We have seen many causes disbanded due to financial structures and traditional banking system with rules and policies that are in place to help themselves and leave the good cause to the wolves.

We hope to be able to use the power of blockchain technology and relevant applications of the same to bridge the gap between the vulnerable in the society and those individuals who are willing to help alleviate their situation. Our team has thought this out to be best since the use of blockchain will pose minimal barriers in accomplishing the goal of this project.

SHIBACOVID

Shiba Inus or Shiba for short, are fox-looking breed of hunting dogs that originated from Japan. Shibas are very alert, sturdy, muscular, and confident. However, when the pandemic hit, human population dropped rendering millions of pets homeless and no one to care for them.

With the very high impact of COVID-19 on people around the world as well as our adorable pets, numerous people and pets need help. The project through its token SHICOV seeks to provide the much-needed support to people and pets across the globe.

The ShicovSwap Vision

We are committed and motivated on building the best Decentralized platform there is. Our token will be the bedrock on which ShibaCovid will be budded.

Our goal is to make ShicovSwap an effective platform for trading ours and your valuable cryptocurrencies while we still stay decentralized. We are and will remain loyal to our community who have made it possible for us to grow immensely.

Our exceptional tokenomics, design, implementation, and immediate growth will help our platform rise in strength and reap the benefits of the platform.

With ShicovSwap, we are making this exceptionally easy and almost too easy for the community to do transactions without the need to leave the eco-system.

ShibaCovid Token is designed to advance beyond just a tryout; we are a decentralized project and have a DEX of our own.

The token SHICOV and its utility:

Token Symbol: SHICOV

SHICOV is the native token of ShibaCovid. It is a BEP20 token launched on the Binance Smart Chain for starter, with the potential to add other network like Ethereum, Cardano, and Polkadot in the near future.

Token Utilities:

1. Governance:

Community members holding certain amount of the native token SHICOV will be invited to an "invite only group" where they can vote on the following:

- a. The humanitarian organization to be supported per quarter
- b. Future development of the project
- c. Community recommendations

2. Deflationary:

A fraction of the transaction fee (both ways) is permanently burnt through an inbuilt deflation mechanism, thereby maintaining stability of the token price, and ensuring the longevity of the project.

3. In-wallet farming:

A portion of the transaction fee will be distributed to all holders proportional to their holding amount of SHICOV.

4. PancakeSwap Liquidity Growth:

In order to maintain a healthy liquidity pool for the SHICOV/BNB pair, a portion of each transaction will be used to buy SHICOV from the open market, and paired with a matching amount of BNB, the pair will then be added to the exchange liquidity pool on PancakeSwap.

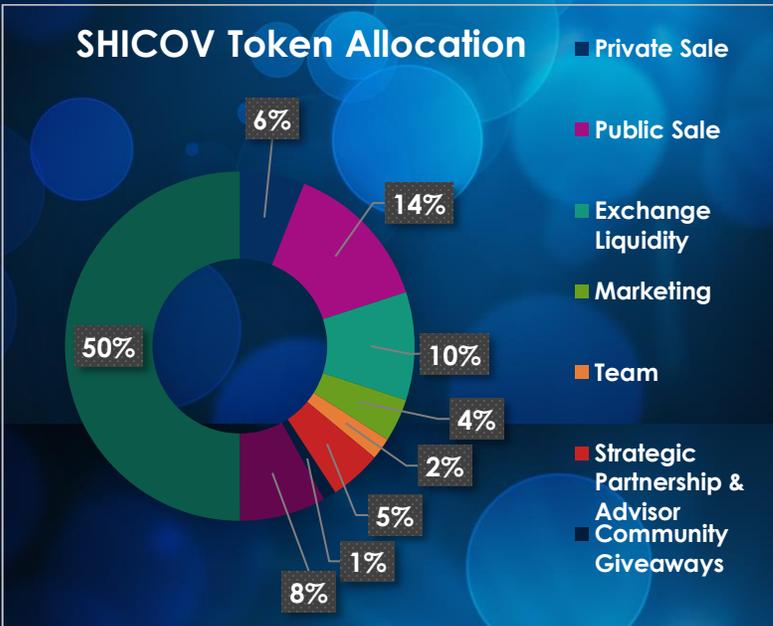

Tokenomics and Allocations

Total Supply: 50,000,000,000,000

Token Symbol: SHICOV

Allocation	Percentage	Token Amount	Locked	Vesting/Release
Private Sale	6%	3,000,000,000,000	2,100,000,000,000	30% at TGE (20% every 60 Days, 10% last month)
Public Sale	14%	7,000,000,000,000	-	100% Unlocked
Exchange Liquidity	10%	5,000,000,000,000	5,000,000,000,000	Locked 1 year on PCS
Marketing	4%	2,000,000,000,000	2,000,000,000,000	2 weeks
Team	2%	1,000,000,000,000	1,000,000,000,000	1 year/10% per month
Strategic Partnership & Advisor	4.80%	2,400,000,000,000	2,400,000,000,000	30 Days
Community Giveaways	1.20%	600,000,000,000	600,000,000,000	1 week after TGE
Reserves	8%	4,000,000,000,000	4,000,000,000,000	6 months
Burn	50%	25,000,000,000,000	25,000,000,000,000	Forever

Distribution	Rate
COVID Charity	3%
In-Wallet Farming	5%
Auto-add to LP	3%
Marketing	1%

TOTAL 12%

Our Team

There is a saying that "If you want to go fast, go alone. But if you want to go far, go with the company of like-minded people." Our team comprises of professionals who are also passionate about helping others.

We are not from an existing group, we are newly founded. Even though we have been in the crypto space for over 5 years on average and each team member brings an extensive knowledge to the team and ultimately to ShibaCovid.

With our purpose ahead of all our endeavors, we can build something strong that has the backbone we need, and the infrastructure we need to accomplish the purpose of the project.

CONCLUSION

ShibaCovid community started with a humanitarian/pro-pets idea. What becomes of our lives post COVID-19 if we cannot help each other get up after falling? What door of possibilities can we unlock in our communities through the act of kindness that we show to those in need using ShibaCovid as a means to reach such individuals and pets. We could follow an upward trend by community driven ideas with great purpose to humanity and pets alike.

This is just the beginning of an epoch where decentralized community will be endless and limitless. ShicovSwap will be important because the time is now for the community to head the right direction with no looking back and with a fortitude that cannot be abolished.

We owe this to us (team and the community) and to us ONLY to take charge of our freedom and have the backs of those who have suffered great losses due to the impact of the pandemic as we build ourselves back up from the remnants of COVID-19.

*****Disclaimer*****

This is a breathing document and the information within is up to date at the time of publishing. Please note that the information herein does NOT constitute any form of investment advice, financial advice, or any form of advice and you should NOT treat any contents herein as such.

The ShibaCovid team suggest you do your own due diligence and consult your financial advisor if you need to before making any investment decisions. By purchasing SHICOV, you agree that you are not purchasing any security or investment and agree not to hold the team liable for any losses or taxes you may incur.

You also agree that the team is presenting this token "AS IS" and IS not required to provide any form of support or services. You should not expect any form or documentation from ShibaCovid and team. While ShibaCovid is a community driven DeFi system and not a registered digital currency, the team strongly suggests that citizen in area with government restricted crypto trading should not purchase because the team cannot ensure compliance with your territories regulations.

Please ensure you are following your local law and regulations before you make any purchases.

Residents of the following countries are ineligible to participate

- Thailand
- China
- Russia
- Ecuador
- Bolivia
- Bangladesh
- Iran
- India
- Macedonia
- Algeria
- United States

There may be other countries not listed above, please ensure your region/territory is in the clear. Also, the above countries may be lifted at some point, please ensure you follow through with your territory for most updated information.
